

## Product Datasheet

### GX3990 - Titanium oxide Nanopowder, 10 - 30 nm, rutile, 99.5%

#### Product Details

|                    |  |
|--------------------|--|
| Product Name       | Titanium oxide Nanopowder, 10 - 30 nm, rutile, 99.5% |
| Glenthams Code     | GX3990   |
| CAS Number         | 1317-80-2  |
| Related Categories | Inorganics, Metal Salts                              |

|                       |                               |
|-----------------------|-------------------------------|
| Physical Description  | : White powder                |
| Average Particle Size | : 10 - 30 nm                  |
| Specific Surface Area | : approx. 50m <sup>2</sup> /g |
| Purity                | : ≥ 99.5%                     |
| Version               | : v1.0                        |

#### About Titanium oxide Nanopowder, 10 - 30 nm, rutile, 99.5%

No further details on record.

#### Structure

|                   |                    |
|-------------------|--------------------|
| Molecular Weight  | : 79.87            |
| Molecular Formula | : TiO <sub>2</sub> |

#### Storage

Recommended storage temperature: +20°C.

#### Hazards and Transport

Not classified as hazardous under CLP.  
Not classified as dangerous for transport.
